

PROFILE SUMMARY

Self-taught **software developer** with a proven track record of innovative problem-solving and consistently delivering high-quality solutions on time. Quick to learn new technologies and eager to take on challenging roles that foster professional growth while contributing meaningfully to organizational objectives.

SKILLS

- **Programming Languages:** JavaScript,Type Script, Java
- **Front End Development:** React, Next, Redux, Redux Toolkit, Context API, HTML5, CSS3, EJS, HBS
- **Backend Development:** Node.js, Express.js, REST API, JWT, Mongoose, MVC Architecture
- **Database:** MongoDB, PostgreSQL
- **Integrations:** Socket.IO, Nodemailer, Twilio, Multer, Razorpay, Stripe, PayPal, Phonepe
- **Deployment:** AWS (EC2), NGINX, Render, Vercel, Digitalocean
- **Tools:** Git, GitHub, Postman, Figma, VS Code, Canva, Swagger API Docs
- **Familiar With:** Data Structures, Firebase, Tailwind CSS, Linux (Ubuntu), Windows

EXPERIENCE

Future Vision for Computer System and Network, Abu Dhabi (2025 – Present)

Full Stack Developer

- Developed a scalable React.js frontend for an engineering consultancy management system with user-friendly interface.
- Implemented role-based access and dashboards for Owner, Admin, and Employee users, supporting project management, tasks, timesheets, and cost tracking.
- Built and enhanced features including contractor management, project workflows, site visit scheduling, and financial overview modules.
- Collaborated with cross-functional teams to fix bugs, optimize UI performance, and deliver stable, production-ready features.

Adam Technologies LLC, Dubai (2022 – 2025)

MERN Stack Developer

- Developed and deployed multiple full-stack applications with optimized performance and seamless user experience.
- Integrated third-party services such as Stripe, PayPal, Nodemailer, and Twilio to enhance platform capabilities.
- Optimized backend APIs and implemented security best practices, resulting in faster data processing and a smoother user experience.
- Collaborated with UI/UX designers, mobile app developers, and QA testers to ensure a user-centered, bug-free product.

COMPANY PROJECTS

EduNexis – Education Platform — Backend Developer

- Built course management, enrollment, and payment modules using Node.js, integrated with a React frontend.
- Collaborated with UI/UX (Figma) and Flutter teams to ensure a seamless web and mobile experience.
- Led API development and frontend integration to enhance performance and maintainability.

Nextis Market – E-commerce Platform — Full Stack Developer

- Developed a scalable multi-vendor platform with secure JWT authentication, product management, and order workflows.
- Integrated Twilio for OTP verification and created detailed Swagger API documentation.
- Implemented role-based admin and vendor dashboards with sales analytics, order tracking, and user management features.
- Collaborated with mobile teams and optimized the backend for speed and reliability.

Livera Community – Mobile App Platform — Backend And Web Developer

- Contributed to the backend development of a large-scale community platform offering e-commerce, ad listings, and business support tools.
- Built and maintained admin panel functionalities using React for managing content, users, and platform engagement features.
- Implemented modules for user-to-user chat, community-driven content sharing, and onboarding for startup teams.
- Collaborated with mobile teams to ensure seamless API integration and scalable system design.

Plus Care – Booking App — Backend And Web Developer

- Developed backend APIs supporting doctor search, lab test bookings, and pharmacy orders.
- Created and maintained the React-based admin panel for managing users, appointments, and inventory.
- Collaborated across backend and web teams to ensure seamless integration and reliable deployment.

PERSONAL PROJECTS

EMPLOYME – Job Searching Platform Full Stack Developer

[Source Code](#)

- Developed job portal with real-time chat, Stripe payments, and Redux-managed React UI.
- Built Node.js/Express backend and deployed via Render and Vercel.

Book Shop – E-commerce Platform Full Stack Developer

[Source Code](#)

- Created secure book store with Razorpay payments, MVC backend, and image uploads via Multer.
- Used EJS templating with MongoDB; deployed to Render.

Client Pic – Event Photo Sharing App Backend Developer

[Source Code](#)
Freelance

- Built APIs for image upload, digital album generation, and personalized event-based access.
- Added user plan management, JWT auth, and PhonePe integration.

Findzyy – Photographer Booking App Backend & Web Developer

[Source Code](#)
Freelance

- Developed backend and React-based admin for booking, category search, and subscription management.
- Implemented location filtering, availability logic, and role-based access control.

EDUCATION

Software Development Brototype, Calicut India	2021
Diploma in Computer Application IHRD, Kerala	2022
Master of Arts in Arabic Calicut University	2022 – 2024
Bachelor of Arts in Arabic Kannur University	2019 – 2022
